Product Data Sheet

Technical Data

Article number	**17001 Carbon-UD-Gusset**
Raw material	**98% Carbon fibre (HTS40 F13) 2% Grilon (400 dtex)**
Construction	**Unidirectional carbon fibres, circular Grilon-winded**
Packaging	**Roll of 50 m**
Weight	**22.1 g/m**
Measures	**Diameter: 5 mm**

Description

The UD-gusset is composed of 27 0°-carbon rovings with a Grilon-winding.
The number of rovings can be increased to attain a particular cross-section.
The UD-gusset is inserted into the preform; it can also be laminated on the prefinished component.
