Technical Data

Item number	15002 Resin Distribution Tape	
Raw material	100% PES	
Construction	Warp-knitted fabric	
Packaging	Roll of 25 m	
Weight	25.8 g/m	
Measures	Width: 43 mm	Thickness: 3.5 mm

Description

Resin distribution tape is composed of a warp-knitted structure and monofilament-created nooses which are used as flow canal. The tape supports the vacuum infusion process. It can be used on the entry side as resin infusion aid and on the exit side as vacuum canal. The tape is easy to handle and to attach, adapts to curved component contours and leaves no appreciable marks.
