

Product Data Sheet

Technical Data

Articel number	15044 Heating Textile	
Raw material	60% Glass fibre 35% Carbon fibre 5% PES	
Construction	Knitted fabric with 1 carbon noose	
Packaging	On agreement	
Weight	98.0 g/m	
Measures	Width: 25 cm	Thickness: 0.5 mm

Description

Length cm	Voltage Volt	Amperage Amp	Resistance Ohm	Temperature °C	Rating Watt
100	45	1.2	38	50	54
200	45	0.6	75	34	27

Heating textiles consist of a warp-knitted basic structure and nooses of carbon fibre, which can be electrically heated. Temperatures of about 180°C max. may be reached. The given electrical resistance allows for low and high voltage solutions. Our technology makes it possible to choose noose geometry freely. Heating textiles also offer high drapability.
