

# Product Data Sheet

## Technical Data

Articel number	<b>15051 Heating Textile</b>	
Raw material	68% PES 32% Carbon fibre	
Construction	Knitted fabric with 12 carbon nooses	
Packaging	On agreement	
Weight	73.9 g/m	
Measures	Width: 25 cm	Thickness: 0.5 mm

## Description

Length cm	Voltage Volt	Amperage Amp	Resistance Ohm	Temperature °C	Rating Watt
100	45	5.77	8	66	260
200	45	2.88	16	33	130

Heating textiles consist of a warp-knitted basic structure and nooses of carbon fibre, which can be electrically heated. Temperatures of about 180°C max. may be reached. The given electrical resistance allows for low and high voltage solutions. Our technology makes it possible to choose noose geometry freely. Heating textiles also offer high drapability.
