

RESIN DISTRIBUTION TAPE (RDT)

RESIN / VACUUM FLOW LINE

SCAN ME

The Gerster Resin Distribution Tape (RDT) is composed of a warp-knitted structure and monofilament nooses which are used as resin flow line or vacuum line. The flowing aid supports and improves the manufacturing of fibre reinforced composites by vacuum infusion processes.

TECHNICAL DATA

- Warp-knitted structure of 100 % polyester
- RDT classic
10 mm | 20 mm | 43 mm
98 mm | 150 mm | 200 mm
- RDT HFR (Higher Flow Rate)
45 mm | 100 mm
- Optional self-adhesive tape

APPLICATION

- Supports VAP® and other vacuum infusion processes
- Resin infusion aid on the entry side or vacuum channel on the exit
- Out of autoclave or during autoclave curing process
- High temperature resin infusion on applications (up to 190°C)
- Qualified for aviation applications

ADVANTAGES

- Easy to handle & fix
- Adapts to curved components
- Uniform flow front
- Almost no imprints for usage on component surface
- High reproducibility
- No collapsing in autoclave processing
- Easy to demould
